PROFILE

Senior Software Engineer with 8+ years of experience in full-stack web development. Specialized in designing scalable frontend architectures (Angular, Vue.js, React) and developing robust backend solutions (Node.js, NestJS, Java Spring Boot). Strong expertise in cloud technologies (AWS, GCP), containerization (Docker, Kubernetes), and DevOps automation. Passionate about building efficient systems, optimizing workflows, and mentoring teams.

EMPLOYMENT HISTORY

Member Of Technical Staff III at Cohesity Inc, Pune

December 2024 — Present

Following the acquisition of Veritas Technologies LLC by Cohesity Inc, continuing the same responsibilities in frontend and full-stack development for System Health Insights.

Senior Software Engineer at Veritas Technologies LLC, Pune

August 2020 — December 2024

- Led frontend development for System Health Insights, an analytics dashboard.
- Managed a Scrum team of 6-8 members, mentoring junior developers.
- Developed a full-stack web application enabling support engineers to triage and debug customer defects.
- Built a CLI application to automate release management across 25+ microservices.

Full Stack Web Developer at Ecozen Solutions, Pune

August 2019 — August 2020

- Developed an IoT analytics dashboard using Vue.js, integrating with a backend REST API.
- Created an MQTT client to process and store IoT data in MongoDB.
- Implemented automated CRON jobs with email alerts for unexpected IoT device behavior.
